

CONTENTS

Review Analysis

A Contribution Evaluation and Reward Framework Based on Shapley Value and Smart Contract.	1-4
Research on Financial Information Management Based on Convolutional Neural Network Algorithm	
.....	5-11
Research on Tax Avoidance and Anti-Tax Avoidance in Data Asset-Related Transactions: A	
Perspective on Related Party Transactions within China.....	12-18
The Impact Mechanism of Green Finance on Carbon Emission Reduction An Empirical Analysis	
Using China's Provincial Panel Data.....	19-33

Application Demonstration

Research on Adversarial Attack Algorithm Based on AI Recognition.....	34-39
Hybrid Transformer-CNN Architecture for Efficient Point Cloud Classification with Attention	
Mechanisms.....	40-46
Monitoring System Practices and Explorations in Heterogeneous AI Platforms.....	47-53
Combining the Optimal Seed Number Determining and SCE-based Data Augmentation for Logical	
Access Attack Detection.....	54-69
A Building Carbon Emission Prediction Model Based on Optimized Machine Learning Model	70-83

Frontier Prospects

Research on the Application and Future Development of Artificial Intelligence in the Exhibition	
Industry.....	84-90
