

CONTENTS

Review Analysis

Research on Multi-dimensional Quality Quantification Standards for Portrait Dataset Images Used in Face Recognition Algorithm Training	01-08
Technical Innovation in Engineering Quality Control Based on Micro Visual Recognition	09-15

Application Demonstration

Research on the Mechanism and Governance Path of Gen AI Content Marketing in Reducing Customer Acquisition Costs and Enhancing Customer Retention Performance	16-22
Exploring Pathways for Artificial Intelligence Applications in Rural Areas: A New Mechanism for Youth Participation in Rural Revitalization	23-29

Frontier Prospects

Research on Privacy Boundaries in Machine-Vision Data Collection	30-35
Research on the Cross-Domain Transmission Mechanism of Algorithm Ethical Risks in Enterprise AI Applications and the Construction of a Closed-Loop Governance System	36-42
Research Progress on Decision-Right Allocation Mechanisms and Value Co-Creation in Human-AI Collaborative Creative Production	43-49
